

Energy policy

Sustainability is one of the most important values of Ideal BIG Floorcoverings Wielsbeke. One of the pillars of sustainability within Ideal BIG Floorcoverings Wielsbeke is energy use and consumption.

The energy policy is an important part of the mission and vision and is fully supported by the board of directors and the management, which assures a solid anchoring of the energy policy in all departments.

Ideal BIG Floorcoverings Wielsbeke undertakes to put the following principles into practice on a day-to-day basis:

- Compliance with all statutory obligations and other requirements relating to energy efficiency, use and consumption is a minimum requirement.
- Organisation of its energy policy according to the internationally recognised ISO 50001 standard (2018 version).
- Provision of resources, giving of access to all information, etc. necessary to achieve the objectives and energy targets.
- Measuring, registering and analysing the most important energy uses and consumptions.
- Establishment and periodic monitoring of energy objectives, and the drafting, implementation and follow-up of action plans.
- Continuous evaluation and improvement of energy performances via measurable and monitorable targets and objectives.
- Periodic evaluation, and where necessary adjustment, of the energy management system by conducting management assessments, internal audits and audits performed by external auditors.
- Energy aspects are an important criterion both in procurement and in the execution of new projects.
- Active involvement of all employees in the implementation of the energy policy.
- Open communication to the various stakeholders.
